

5<sup>th</sup> March, 2014

- The EkoSkola Committee watched a video of what is being done around the world to help save water.
- We further discussed water wastage and ways to save water.
- Pupils' contributions with regard to saving water:
  - putting buckets in yards and roofs to collect rain water;
  - putting water hippos in water cisterns;
  - closing water taps properly, making sure they are not dripping;
  - taking showers instead of baths;
  - not leaving water running when washing hands, fruit, and brushing teeth.
- Pupils pointed out that rain water that goes into wells can be used to wash floors, water plants and flush toilets.
- Pupils were shown how the water cycle works, so that they would understand where rain water comes from.
