

Newspaper Shark Craft

Supplies needed: -

- light blue, dark blue, black and white cardstock paper
- newspaper
- googly eyes
- scissors
- glue

What to do: -

1. Start by cutting out your shark face shape from your newspaper. The fun part about this craft is that everyone can create a different shark. You can make it skinny or wide, short or tall, any way you like. Glue your shark face onto your light blue cardstock paper.
2. Cut out ocean waves from your dark blue cardstock paper (or construction paper) and glue them at the bottom of your light blue paper, underneath the shark face.
3. Cut out a shark mouth and teeth from the black and white cardstock paper. Glue them onto the shark face, together with the googly eyes.
